

BOSS[®] EXPANSION JOINT SEALANT

BOSS EXPANSION JOINT-SEALANT IS A ONE-COMPONENT, SELF LEVELING SILICONE SEALANT.

It is a sealant that cures to a firm flexible, silicone rubber. It is UV resistant and adheres to concrete, brick, masonry, wood, glass, vinyl and most plastics.

Features:

- No mixing
- 50% movement capacity
- 20-30 minute tack free time
- VOC compliant

AVAILABLE IN:	PART #
White	BJS629W
Tan	BJS629T
Grey	BJS629G

DIRECTIONS

1. Surface should be clean and dry.
2. Joints deeper than ½" should be filled with Poli-Void before applying sealant.
3. Cut end of nozzle to desired opening and apply sealant by pushing sealant ahead of nozzle.
4. Allow 24 hours for full cure on most joints.

SPECIFICATIONS

Meets ASTM C 920, Type S, Grade P, Class 25, Use NT; TT-S-00-230C Type 1 Class A; CGSB 19.13 Class 1 Class 25.
