

CHAMFER CLIPS

A MUST FOR CONTRACTORS USING TOOLED JOINTS

POOLS

Secure Chamfer Clips to the inside of the form using the nails provided and mark the form edge. Apply form release to all clips.

Tool the joints using the marks for alignment.

Remove the forms exposing the face to be finished.

WALLS

STEPS

CHAMFER CLIPS

are a preformed, reusable plastic mold that is fastened to the inside surface of a Stegmeier form continuing the jointer detail over the edge of the vertical surface. Chamfer Clips are a must for the contractor using tooled joints.
