

STEP LINERS

STEGMEIER STEP LINERS MAKE FORMING STEP RISERS EASY.

Use spray adhesive and/or roofing tacks to fasten Step Liners to the inside of formwork. Radius steps may be formed by attaching Step Liners to Slip-n-Join Lumber (a reusable plastic bender board by Stegmeier LLC). Breakaway slots allow for three riser heights. Step Liners may be stripped and finished much earlier than conventional forms.

STEP LINERS

Step Liners are a flexible foam step liner used to produce architectural profiles when pouring concrete steps. These labor saving forms are attached to the inside of the wood forms using spray adhesive, nails and or roofing tacks. Breakaway slots allow for three riser heights. Step Liners may be stripped and finished much earlier than conventional forms.

The Right Tools Make All The Difference

FOAM PROFILE EDGING TOOL

Uniquely designed, this tool is made of foam and matches the profile exactly. With this tool the craftsman can remove the forms early, mist with water and apply a clean crisp finish without chatter marks (imperfections caused by the tool riding over stones).

STAINLESS STEEL TROWELS

Quality made traditional stainless steel edge finishing tools.
