

# Tear Away Plumb Strip Instruction Sheet

- 1 Make sure the top edge and face of the pool wall is clean and dry.
- 2 Peel paper from the tape on the back side of the Tear Away Plumb Strip.
- 3 Adhere the Tear Away Plumb Strip by pressing it firmly against the face of the pool wall.
- 4 Install a screw 2 inches from each end of the Tear Away Plumb Strip and space the remainder of the screws required for each 8-foot section, 14 inches apart.
- 5 Install each Tear Away Plumb Strip flush with the adjoining Tear Away Plumb Strips to accomplish a seamless look.
- 6 Tear Away Plumb Strip-Flex needs tape to be placed over the flex notches to prevent concrete from getting on the pool surface. IMPORTANT do not tape over "T" member, it must remain exposed.
- 7 Set forms per instructions
- 8 When concrete is firm enough to support its own weight, strip the forms and finish the cantilever edge.
- 9 Make sure the face of the Tear Away Plumb Strip is cleaned off after finishing the cantilever edge.
- 10 When concrete is completely set, remove the face portion of the Tear Away Plumb Strip and dispose of it properly.
- 11 Do not use Tile Strip when installing Tear Away Plumb Strip.
